- Economic research and analysis: Strong research capabilities to gather and analyze economic data, conduct market research, and provide data-driven insights for informed decision-making.

- Statistical software proficiency: Proficient in using statistical software such as R, Python, E-views and SPSS to perform data analysis, regression modeling, and hypothesis testing.

Software Engineering Skills:

- Full-stack software development: Proficient in developing end-to-end software solutions, utilizing front-end technologies (HTML, CSS, JavaScript, React, Typescript) and back-end frameworks (Django, Rails) for seamless functionality.

- Object-oriented programming (OOP): Skilled in OOP principles and applying then to design and develop efficient and scalable software applications.

- UI/UX design: Proficient in creating user-friendly interfaces and intuitive user experiences, incorporating principles of user-centered design and usability testing.

- Version control: Familiarity with version control systems like Git, enabling collaborative development, and ensuring code integrity.

- Software testing and debugging: Capable of conducting through testing, identifying bugs, and debugging code to ensure high-quality and error-free software.

ADDITIONAL SKILLS

- Good communication skills.
- Adaptive and creative.
- Graphics designer
- Photographer

HOBBIES

1. Reading novels
2. Travelling
3. Watching
4. Listening to music
5. Coding

EXPERIENCE

Graphics Designer

Clicks Triple Four Services – Eldoret, KE

August 2020 – July 2021

Responsibilities:

- Concept development: Collaborating with clients or creative teams to understand project requirements and develop visual concepts and design ideas.

- Visual design creation: Creating visually appealing designs using various design software and tools. This can include designing logos, illustrations, layouts, and other graphical elements.

- Branding and identity design: Developing and maintaining consistent visual branding elements such as logos, color palettes, typography, and visual style guides for clients or organizations.

- Layout and composition: Designing layouts for print or digital media, including brochures, posters, websites, social media graphics, and other marketing materials.

- Image editing and manipulation: Enhancing and retouching photographs, editing images, and creating composite visuals using software like Adobe Photoshop.

- Typography and text design: Selecting and formatting appropriate typography to effectively convey messages and maintain visual consistency in designs.

- Print production coordination: Preparing designs for print production, collaborating with print vendors, and ensuring the final output meets quality standards.

- User interface (UI) design: Creating intuitive and visually appealing interfaces for websites, mobile applications, or software, focusing on user experience and interaction design.

- Collaboration and communication: Working closely with clients, creative teams, and stakeholders to understand project objectives, provide design recommendations, and incorporate feedback.

- Keeping up with design trends: Staying updated with the latest design trends, tools, and technologies to continuously improve design skills and deliver innovative and engaging visual solutions.

Intern

Kenya National Bureau of Statistics – Baringo, KE

Jan 2020 – July 2020

Responsibilities:

- Literature review: Conducting extensive research and reviewing relevant literature to gather information and insights related to the research topic.

- Data collection: Gathering and compiling data from various sources, which may involve conducting surveys, interviews, or experiments.

- Data analysis: Analyzing collected data using statistical software or other analytical tools to identify patterns, trends, and correlations.

- Assisting in research design: Collaborating with the research team to develop research methodologies, experimental protocols, and data collection instruments.

- Organizing and maintaining research records: Managing and organizing research materials, data files, and documentation to ensure proper record-keeping.

- Writing research reports: Assisting in the preparation of research reports, academic papers, or presentations by providing input, proofreading, and formatting assistance.

- Collaborating with researchers: Working closely with the principal investigator or research team members to support ongoing research projects, contribute ideas, and discuss findings.

- Ethics and compliance: Adhering to ethical guidelines and research protocols while ensuring confidentiality, integrity, and compliance with institutional or regulatory requirements.

- Presentation and communication: Assisting in the preparation of presentations, posters, or conference materials to effectively communicate research findings to stakeholders.

- Administrative support: Assisting with administrative tasks, such as scheduling meetings, managing correspondence, and maintaining research-related budgets.
